---

## SKILL

**HTML5 / CSS3 / Less / Scss / Bootstrap / Tailwind CSS**

**JavaScript / React JS / Chakra UI / jQuery**

**WordPress / ACF / Shopify Frontend**

**GitHub (CI / CD) / Bitbucket**

---------------------------------------------

## TOOLS

**VS Code / Sublime / Postman / File Zila**

**Trello / JIRA / Slack / Netlify**

**AWS / Go Daddy / Hostinger / Blue Host**

**Figma / Adobe XD / Photoshop**

---------------------------------------------

## AWARDS

**Outstanding Performance of the Department  - Team Frontend**

**Infinity Soft Systems**

**Year - 2023**

---------------------------------------------

## EDUCATION

**BSC IT**
**I.K. Gujral Punjab Technical University**

2011-2014

## PROFILE

With 8 years of development experience, I've used advanced technologies and mentored junior developers. My work has improved scalability, refined UI/UX design, and boosted user satisfaction by 50%, product efficiency by 80%, and client-side script performance by 25%. Proficient in React, HTML, JS, and CSS.

## WORK EXPERIENCE

**Sr. UI Developer / Frontend developer**
Sigmond Morgan IT Solutions Pvt. Ltd          2023-2024

- I successfully refactored Cifdaq's client-side web architecture to introduce a reliable Single Page Application (SPA).
- Collaborated closely with Project Managers and Incident Managers to align with the project plan and timeline. This proactive approach streamlined communication, saving an average of 4 days per project.
- Leveraged A/B testing and user feedback analysis as key strategies for continuous enhancement of the user interface design. This data-driven approach led to a significant 15% uplift in user satisfaction scores within a span of six months..

**Sr. UI Developer / Frontend developer**
Infinity Soft Systems          2021-2023

- I have developed fully customizable HTML to WordPress conversions, utilizing the ACF Plugin and a variety of WordPress builders. These include Divi, WPBakery, Elementor, and Gutenberg, enhancing flexibility and user experience.
- I have contributed to a diverse range of e-commerce projects, both large and small, utilizing React JS in conjunction with third-party UI libraries such as Chakra UI. These projects were backed by Shopify, Node.JS, and Laravel.
- In addition, I have collaborated with cross-functional teams to implement accessibility standards and guidelines. This collaboration resulted in a 50% increase in accessibility compliance, leading to a more inclusive user experience.

### UI Developer / Frontend developer
Smile IT Solutions          2019-2021

- I've utilized the advanced functionalities of HTML5 and CSS3 & WordPress technologies to meticulously craft, develop, and refine seamless web applications. These applications are meticulously engineered to ensure compatibility across diverse browsers and platforms, ensuring a smooth user experience regardless of the device or system being used.
- I have contributed to the creation of various designs, including banners, images, and logos, utilizing tools such as Photoshop and Adobe XD.
- Proficient in assisting developers with the integration of design elements across various PHP frameworks, including Laravel and CodeIgniter

### UI Developer / Frontend developer
Xpress Web Solutionz          2016-2019

- I have crafted an interactive layout utilizing HTML, CSS, and JavaScript, thereby enhancing user experience, ensuring high-quality design, and maintaining cross-browser compatibility.
- Adept at assisting developers with design integration across various frameworks such as Net, MVC, VB. Net, and. Net, and .Net Core.
- I have developed a hybrid mobile application using Ionic frameworks 3 & 4, leveraging Angular and Sass. The application was thoroughly tested on both real devices and simulators for Android and iOS, including the Xcode simulator. Following successful testing, the application was deployed on both the Google Play Store and the iOS App Store. The latest code was managed using GitHub for version control and project management was handled with Jira.
- By implementing rigorous user interface testing and optimization strategies, we achieved remarkable results: a 15% surge in conversion rates and a notable 10% uptick in user satisfaction scores within just one year.

# P R O J E C T
**https://www.drillcut.au/ - Shopify, Core PHP, React js, JavaScript, Chakra UI, CSS**

- In an e-commerce project, I handled UI development with Chakra UI in React.JS, managed codebase via GitHub's CI/CD pipeline with AWS, and used Netlify for staging.
- Building custom components and integrating new functionality for the FE build process, tracked tasks on Trello with Git, and held daily Zoom meetings for updates.

**https://www.bromicrefrigeration.com.au/ - HTML, CSS3, Javascript, Bootstrap, ACF, WordPress**

- In this e-commerce project, I was responsible for full UI development using HTML and integrating it into WordPress through Advanced Custom Fields (ACF).
- I created custom templates as per design requirements and conducted weekly client demonstrations via Zoom.

**https://rs-rock-paper-scissors-game.netlify.app/ - HTML, CSS3, JavaScript -Personal**

- Dive into this cool, old-school game that's been meticulously crafted using HTML, CSS3, and JavaScript. The heart of this game lies in its JavaScript functions, bringing the game to life.
- This project is hosted on netlify with an automated CI / CD Pipeline from GitHub Link (Rock-Paper-Scissors).
